WELCOME NOTE

Welcome to the third edition of **AIDC²**, the region's premier platform for AI, datacenter ecosystems, data cloud and applied AI innovation. **AIDC² 2026** builds on the success of **2 very successful rounds**, expanding its reach and impact across the Middle East and Africa.

This year, we gather under one roof to explore how modern datacenters and AI use cases are transforming **education, healthcare, aviation, finance, agriculture, and beyond**. Together, we are shaping the digital future of two continents.

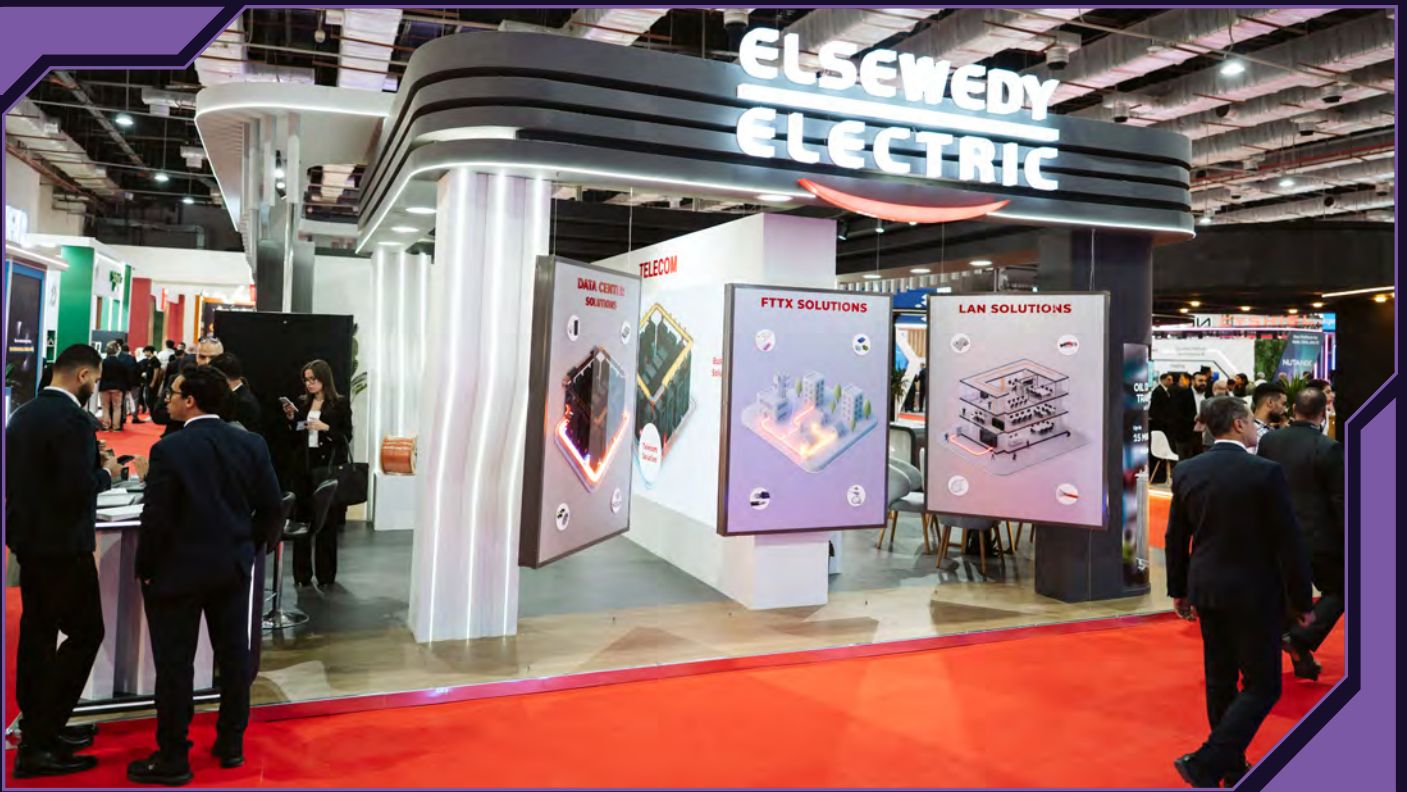

Experts from the region will be present from the region and beyond, alongside government officials and investors to build the future and face the challenges.

It is my pleasure to welcome you to four days of hardcore business and entertaining times under the charming skies of Cairo, Egypt.

Ossama Kamal
Executive President

EVENT OVERVIEW

AIDC² is more than a conference: it is a living ecosystem. It connects infrastructure providers, AI innovators, policymakers, and enterprises to accelerate digital transformation.

AIDC² was created to unite the pillars of digital transformation: robust infrastructure and intelligent applications. Datacenters provide the backbone, while AI delivers the intelligence that drives progress across industries.

At **AIDC²** '26, you will walk through exhibition halls filled with cutting-edge solutions, hear from leaders shaping the future of technology, and engage in discussions that address the challenges and opportunities of our region. Whether you are a policymaker, an enterprise leader, a researcher, or a startup founder, **AIDC²** offers a platform tailored to your ambitions.

WHY AIDC²?

The Middle East and Africa are rapidly growing markets with strong potential in AI, smart cities, and sustainable energy. The MEA market is projected to exceed **USD 14 billion** by **2028**, driven by AI's transformative power. AIDC² unites AI, Data Centers, and Cloud to foster innovation and efficiency, especially in the region, where data is the foundation for future advancements in technology and business.

The Living Ecosystem of AI

Artificial Intelligence is not a single technology; it is an ecosystem. At AIDC² '26, we showcase how compute, infrastructure, data, models, orchestration, applications, and governance converge to power innovation. This ecosystem is the backbone of digital transformation across the Middle East and Africa.

Compute & Infrastructure:

Powering Intelligence with Compute & Infrastructure

AI thrives on processing power. Datacenters equipped with GPUs, TPUs, and edge computing nodes enable real-time decision making. At AIDC² '26, exhibitors will present next-generation processors and sustainable datacenter designs.

Data & Models: **From Raw Data to Intelligent Models**

Data is the lifeblood of AI. Clean, diverse datasets fuel models that transform industries. AIDC² '26, conference will explore *Machine Learning Operations*, vector databases, and foundation models fine-tuned for healthcare, aviation, finance, entertainment and more.

Orchestration & Applications: **Connecting Workflows, Delivering Value**

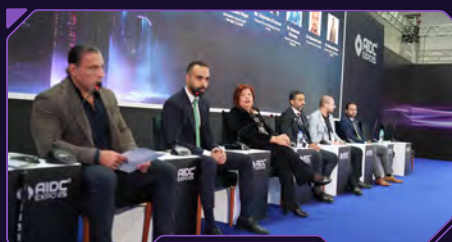

AI orchestration platforms integrate models into enterprise workflows, enabling seamless automation. Applications range from smart classrooms to predictive healthcare, aviation safety, and smart city logistics. **AIDC² 2026** highlights real world deployments across Africa and the Middle East.

Governance & Ethics: **Responsible AI for a Shared Future**

Trust is the foundation of adoption. AIDC² '26 dedicates more than one session to ethical AI frameworks, compliance standards, and cultural values. By aligning innovation with responsibility, we ensure AI benefits societies across both continents.

WHO WILL YOU MEET AT AIDC² '26:

- Investors
- Regional Government Officials
- Hyperscalers
- Data Centre Operators
- Finance and Investment Institutions
- Network Operators
- Energy, power, cooling and electromechanical providers
- Cloud and Edge Computing Providers
- Green Energy Providers
- Cybersecurity and Physical Security Companies.

EDUCATION

AI is reshaping classrooms and campuses:

- Personalized learning pathways.
- Smart content delivery.
- AI powered assessment tools.
- Digital inclusion for underserved communities.

HEALTHCARE

Healthcare innovation is accelerating:

- AI diagnostics for faster, more accurate results.
- Predictive analytics for public health.
- Telemedicine bridging rural gaps.
- Robotics in surgery and patient care.

AVIATION

Aviation is entering a new era:

- Predictive maintenance reducing downtime.
- AI driven safety systems.
- Passenger experience personalization.
- Smart logistics for cargo and operations.

MEDIA & ENTERTAINMENT

Show business and cinema are evolving:

- Script generation accelerating story development and ideation.
- Casting and audience analytics predicting star power and viewer demand.
- Post-production automation enhances editing, dubbing, and visual effects.
- Virtual actors and digital sets expanding creative possibilities on screen.

BUSINESS & INDUSTRY

Enterprise transformation is accelerating:

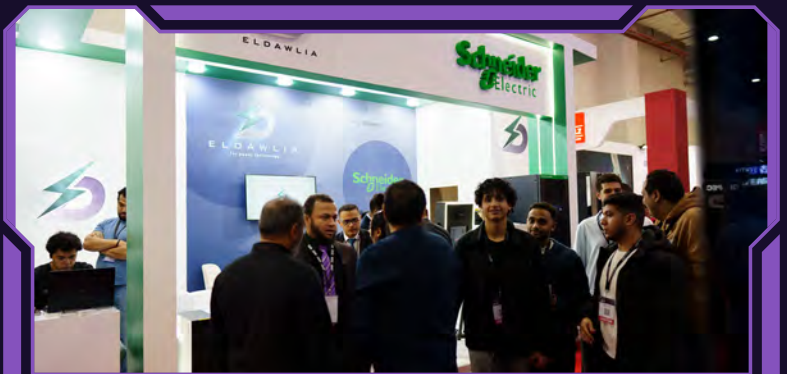

- Process automation streamlining workflows and reducing costs.
- Predictive analytics guiding smarter decisions and market strategies.
- AI enhanced customer engagement powering chatbots, personalization, and service.
- Supply chain intelligence optimizing logistics and resilience.

MIDDLE EAST- AFRICA BRIDGE

AIDC² '26 is a gateway for collaboration: It is strategically positioned to bridge the Middle East and Africa. The event fosters collaboration across borders, enabling investors, innovators, and policymakers to share knowledge and resources. Egypt, with its unique geographic and cultural position, serves as the gateway for this partnership.

Participants contribute to building a digital corridor that connects two continents, accelerates innovation, and ensures sustainable growth.

- Connecting investors with innovators.
- Sharing knowledge across borders.
- Building partnerships for sustainable growth.
- Positioning Egypt as a hub for regional digital leadership.

PARTNERSHIPS & ALLIANCES

Government, academia, and private sector converge at **AIDC² '26**:

- Policy dialogues shaping regulation.
- University research showcased.
- Industry alliances announced.
- Startups empowered to scale.

CAIRO ICT CONNECTION

By collocating with **Cairo ICT**, **AIDC²** benefits from:

- Shared audiences of 100,000+ visitors.
- Crosspollination of ideas between ICT and AI.
- One of the region's largest tech exhibition platforms.
- Cloud and edge computing architectures that bring intelligence closer to users.
- Green datacenter solutions that reduce energy consumption and carbon footprint.
- Cybersecurity frameworks that safeguard critical national infrastructure.
- Regional **hubs** that connect Africa and the Middle East to global digital highways.

This ecosystem is the foundation upon which AI thrives, enabling realtime analytics, scalable applications, and resilient services.

**SECURE YOUR
SPACE TODAY**
AND JOIN THE
LEADERS SHAPING
THE FUTURE OF AI.
